

What Parents & Carers Need to Know about SETTING UP APPS, GAMES AND SOFTWARE

Millions of new phones, tablets, laptops and games consoles will be nestling under Christmas trees this year. However, even if parents and carers have gone to the trouble of setting up these new devices and enabling the safety features, there are still potential hazards in the apps, games and software that children will want to install and use. Knowing what to look for and discussing those risks with your child may help avoid any nasty surprises this Christmas. Here are our top tips for ensuring that unwrapping this year's presents doesn't unleash any unexpected dangers.

TAKE NOTE OF AGE RATINGS

Back when most games were bought in shops, checking the age rating was easy: it was on the front of the box. Now that most games are downloaded, it's tougher – but not impossible. All reputable download stores show a game's age rating at the point of purchase, and you can check the suitability of a specific title your child wants to play at videostandards.org.uk/RatingBoard/games.

18

'FREE' ISN'T ALWAYS FREE

The games market has changed radically in recent years. Many titles are free to download, but then tempt players to pay for cosmetic items (as in Fortnite) or to unlock additional content. There can be huge peer pressure for children to pay for these items. Agree a budget for in-game purchases before the game is downloaded, and make sure children can't authorise in-game purchases by themselves.

DISABLE IN-APP PURCHASING

It's not wise to leave children with devices that can make in-app purchases without your permission. Ideally, set up computers, consoles and phones so child accounts need an adult's authorisation to buy anything. On shared devices (like iPads, which don't allow user accounts), check the settings to ensure that in-app purchasing requires the account holder's password, fingerprint or face ID.

APPS ARE AGE RATED, TOO

Like games, apps in the major stores have age ratings, too – so you can see in advance whether an app's appropriate for your child. Additionally, phones' parental control settings allow you to set age limits, preventing young ones from downloading unsuitable apps themselves. These ratings aren't infallible, however: we've seen TV apps featuring adult shows with an age rating of 3, for example.

18

CONSIDER STORAGE

Most apps and games will tell you in the online store how much space they need on a device. Check this carefully – especially with games, which can run into hundreds of megabytes and beyond. If you don't have enough free storage on a device to run the game or app, you won't get a refund from the store. You can normally check a device's available storage space through the settings menu.

IN-APP REGISTRATION

It's common for apps and games to ask users to register: entering personal details like email address, date of birth and other information you might not want your child to divulge. Ask them to get your permission before giving any personal info to an app – and consider using your details rather than the child's, so they're not targeted by marketing spam or put at risk of having their data stolen.

HELLO OSCAR

WATCH OUT FOR IMITATORS

Even in the official stores, untrustworthy rogue apps can slip through the net. Common tricks are apps or games that have a slightly different name to the genuine article (Fortnite rather than Fortnite, for instance) or use logos which deliberately look very similar to the official app. To avoid downloading these imitations, read the app's description and check who the publisher is listed as.

TOK TAK

STAY UPDATED

Most games and apps are subject to regular updates, which not only offer new content and features but also provide critical security improvements. Children tend to ignore such updates – usually because they don't understand why they're important, or they simply want to get straight on with gaming. Check your child's devices periodically to make sure these updates are being installed.
